This CD was recorded a magical evening called "Lucia", live at Teaterstudio Lederman in Stockholm. Klas Nevrin Ensemble is an exciting collaboration between five creative musicians otherwise working in groups as diverse as *Yun Kan 10*, *Barry Guy New Orchestra*, *The Schematics*, *Fens*, *Saigon*, *Music is the weapon*, and *Robric's Nest*. The result is a highly original and intense exploration of the possibilities of improvisation through a myriad of methods, sounds and moods.

The original compositions are inspired by a variety of sources — from "classical composers" such as Chopin, Ives and Ligeti, to microtonality, world music and jazz. Moving freely between constrained minimalistic compositions, world music grooves, lyrical melodies and expressionistic improvisations, this group is an unusual and valuable voice in contemporary improvisation.

"Klas Nevrin's original music has an intellectual quality that is often lacking in music, but it's not necessarily an intellectualization for it's own sake. Rather, it requires the musicians to go with feeling, hand in hand with a context that excites the imagination already from the start. Nevrin is a musician and composer that simply stretches a little further."

– Johannes Cornell, *Dagens Nyheter*.
